

Description: Plate Mounting Tape

Product: Focus SS

Focus SS is a premium quality, high-value Flexographic plate mounting tape, from Edward Graphics. Their plate mounting tapes are manufactured under strict ISO 9002 standards to meet the requirements of the demanding Flexographic pressroom. Its soft foam carrier makes this product ideal for process printing.

Focus SS (Super Soft) - Focus SS is the ideal choice for process printing fine screens and vignettes. Because of its low density foam carrier, dot gain is minimized and print quality is improved (White foam carrier).

- Consistent thickness
- Repositionability
- Clean removal
- Conversource Custom Cut Program
- Value

Consistent thickness - The Focus SS foam carrier is precisely manufactured, resulting in consistent thickness both within a roll and from roll to roll. Consistent thickness eliminates registration issues, both plate-to-plate and plate-to-die. Focus SS is available in .015" and .020".

Repositionability - The plate-side adhesive is formulated to provide repositionability during plate mounting, while insuring a firm hold during the press run.

Custom Cut Program - Conversource stocks Focus SS in master rolls, and cuts to your exact requirements. You order exactly what you need and pay for exactly what you get. Odd-size offcuts are eliminated, reducing your cost.

Value - Focus SS performs like a premium tape but is attractively priced. Its combination of performance and price make Focus SS an outstanding value.
