

SONIC KLEEN

SK-06: 6 gallon (23 L) jerrican
SK-30: 30 gallon (114 L) drum

SONIC-KLEEN water-based concentrate for laser engraved ceramic anilox rolls is an industry leader in Ultrasonic chemistry. This is the only solution you need for soaking and cleaning ink and resin clogged rolls and restoring them back to maximum cell volume, virtually eliminating costly re-coating or replacement of your anilox rolls.

SONIC-KLEEN's superior cleaning capability is the result of over 15 years of laboratory and on-site testing with all types of ultrasonic devices and all major brands of water-based inks. The result of this intensive testing is a product that works every time in virtually every type of environment. SONIC KLEEN concentrate is available immediately.

*** Please note that whenever handling Sonic Kleen, please adhere to all safety recommendations as directed by the Material Safety Data Sheet. Prior to disposal of Sonic Kleen, check with the local waste treatment authorities for possible disposal methods.
